9:30 AM

Professor Montgomery Keane (Helmsman)

Morning Review

Good morning, team.

I am Montgomery Keane, your old friend. Have you ever experienced this? The true passion does not come from the moment you reach your goal, but from the thrilling anticipation as you approach it. Just like yesterday's Super Bowl. Every second leading up to the game was filled with excitement and expectation. Regardless of which team claimed victory, what we truly enjoyed was the adrenaline-fueled anticipation. Investment is no different. The real reward is not just the final return but the courage to take that first step and fully commit to the process!

NAS COMMUNITY

Opportunities in the market do not wait for those who hesitate. They belong to those with vision and the courage to act. Reflecting on the 'Battle of Kings' 300-1000% profit challenge, those who took decisive action are now standing at the pinnacle of wealth, while those who hesitated may still regret missing the best entry points. But now, a new golden opportunity is upon us, QTPT IEO!

This is not just another investment opportunity. It is a transformational moment. QTPT possesses robust technological backing, a unique market position, and unparalleled growth potential. It is not merely another high-quality IEO token, it is poised to become a key driver of future wealth flows. The question is..will you seize this moment?

If you have been waiting for an opportunity to break through, this is it!! Act boldly, do not let this be another missed chance. Right now, you are just one decision, one bold action away from reaching an entirely new level of financial success. The future belongs to those who are willing to fight for it.

Today, you choose to take action, tomorrow, you will stand at a new height! 🚀 🔥

NAS COMMUNITY

Over the past week, we have embarked on an extraordinary journey, uncovering the secrets of high-quality IEO investments and witnessing QTPT's inevitable outperformance over GEBT. The market has responded with overwhelming enthusiasm, wave after wave of capital flowing into this opportunity. Those who acted swiftly and strategically have already gained an edge, and all of this is not coincidence. This is more than just financial growth, but a call of destiny and a journey of self-salvation!

Now, we are standing at another golden moment. This is not just an opportunity to witness a market miracle, it is a chance to create one with our own hands! Our wealth matrix is accelerating in formation, and its profit potential is set to exceed all market expectations! So what should we focus on next? How do we pinpoint the optimal entry timing?

As QTPT IEO enters its most critical phase, a market storm is brewing, and a major breakthrough is imminent. Every step from here on could determine the outcome! Are you ready to embrace this new chapter that could redefine your financial future?

NAS COMMUNITY

- Is the market signaling even greater opportunities?
- How can we leverage market inefficiencies to gain a competitive edge?
- How will the unique advantages of QTPT lead the next wealth revolution?

Now, follow my lead and seize this historic investment opportunity! Every correct decision lays the foundation for future success. Opportunities do not wait, only those who take decisive action will stand at the peak!

NAS COMMUNITY

The market trend is clear, and the critical moment for decision-making is now.

Friends, recent market movements have been fully aligned with our expectations. Those three major indices continue oscillating within their high-level trading ranges. As illustrated in the chart, the Dow and S&P 500 have reached the upper limits of their ranges, with the Bollinger Bands beginning to tighten, exerting pressure. The battle between bulls and bears is still playing out within this consolidation phase. Meanwhile, the VIX fear index remains at the lower boundary of a triangular formation, signaling a pattern that demands close

NAS COMMUNITY

attention! The bulls are gathering strength, but if the VIX suddenly spikes, it will indicate declining risk appetite, potentially triggering a market correction.

The market is delivering a critical signal! Over the past 5 weeks, U.S. equity funds have experienced four rounds of capital outflows. Just last week, investors pulled out \$10.71 billion from U.S. stock funds, the largest weekly outflow since December 18, 2024. This is not merely short-term volatility but a deep structural shift in the market.

- **Key reasons behind capital outflows:**

-  **Uncertainty from Trump's new tariff policies. Geopolitical risks are rising, prompting investors to hedge against potential shocks.**

-  **Tech stocks' earnings fell short of expectations, damaging market confidence. Alphabet's (Google's parent company) cloud computing revenue fell short of market expectations, while large-scale AI investments made investors worry about profitability. Advanced Micro Devices (AMD) weak data center sales forecast further amplified the market's anxiety about overheated AI investment.**

NAS COMMUNITY

- **Key data on investor capital flows:**

△ **Large-cap equity funds saw an outflow of \$6.44 billion, marking the largest single-week withdrawal since December of last year.**

△ **Small-cap equity funds experienced an outflow of \$2.02 billion, reflecting a notable increase in risk aversion.**

△ **Multi-cap and mid-cap funds recorded outflows of \$1.12 billion and \$335 million, respectively.**

From a monthly perspective, three major indices remain at absolute highs, and monthly-level decline is brewing. Against this backdrop, our investment strategy must be more forward-looking. Until the market experiences a major drop, a defensive approach remains the priority. If your stocks are experiencing minor losses, I strongly recommend selling and shifting toward the certainty of profits in the crypto market. If losses are substantial, do not rush to increase positions now. Instead, wait for the market to stabilize before adjusting strategies accordingly. The time cost of using funds is crucial. We must seize the most certain profit opportunities instead of wasting time in inefficient markets!

NAS COMMUNITY

- **The Federal Reserve's policy outlook & market impact**

Last Friday's series of economic data further reinforced our judgment. Federal Reserve is highly likely to maintain its current interest rates until at least May. The market is still waiting for the real start of rate cuts, but before that happens, stock indices will continue to fluctuate, fear will gradually spread, and both confidence and technical indicators will take time to recover.

Key focal points this week:

- 1. The dollar & Treasury yields. A synchronized decline in both will further weigh on stock indices.**
- 2. Critical economic data. On Wednesday, the January CPI year-over-year and month-over-month figures will be released, alongside Fed Chair Powell's semi-annual monetary policy testimony before Congress. These events will trigger substantial market volatility, creating new trading opportunities for derivatives strategies!**

How to efficiently allocate funds?

To maximize capital efficiency and ensure no conflict with the QTPT IEO subscription phase, we will seek momentum trades after economic data

NAS COMMUNITY

releases. Additionally, once the QTPT allocation results are announced on Saturday, we will restructure capital deployment and make comprehensive preparations for QTPT's market debut.

Action is superior to waiting, decision-making surpasses hesitation!

If a favorable trading signal emerges this week, we will notify all VIP partners immediately. For those who wish to explore derivatives trading in depth or are just beginning to allocate funds, feel free to message me for personalized guidance. Remember, the key to investing lies in insight and decisive execution! This will be a week full of opportunities, let's seize the moment and embrace a prosperous market together!

The market's pace is accelerating, requiring us to be more alert and decisive than ever. Stock market fluctuations continue, and a mid-to-late February shift could happen at any moment, while volatility in crypto market is also intensifying. Before the storm arrives, we have already achieved an astonishing 1000% profit in the "Battle of Kings," but this does not mean our derivatives trading is coming to an end. This week, we remain laser-focused on major data releases, and once a high-confidence trade signal appears post-data release, VIP partners will receive our strategy immediately, ensuring precise execution.

NAS COMMUNITY

At the same time, the crypto investment frenzy is reaching new heights. The 450x surge of TRUMP Coin in just two days has sent global investors into a frenzy, officially marking the beginning of the trillion-dollar era of ICOs. Meanwhile, GEBT skyrocketed 17x within just seven days post-listing, not only shocking the market but also revealing the immense potential of the IEO sector. In this space, we have the opportunity to surpass months of derivatives trading profits in less than two weeks. This is the golden opportunity of the moment.

The window for high-quality IEO investments is extremely short, typically lasting only a month. Once missed, the opportunity may never return. Compared to traditional stock market investments and derivatives trading, IEO provide high certainty and high returns, making them the most valuable segment to focus on right now. As a result, we have decisively adjusted our strategy to concentrate on high-quality IEO projects, fully capitalizing on this once-in-a-lifetime financial feast. Once the stock market correction is complete, we will return stronger than ever, re-establishing positions in derivatives and equity trading, securing dominance in the next market uptrend.

Every market cycle brings new opportunities, and true winners never wait instead they take action. The opportunity is right in front of you, and whether

NAS COMMUNITY

you seize it depends entirely on your ability to act. Now is the best time, let's stay committed, act swiftly, and embrace the next financial peak together, creating a future of prosperity!

Dear NAS family, crypto revolution of 2025 has officially begun, and we are standing at the forefront of an unprecedented financial transformation! In this exciting era, I hope to engrave the five core investment strategies of QTPT IEO into the minds of every family member, helping everyone advance with the most intelligent strategies, seize the initiative, and claim victory!

Investment Key Point 1: The progress bar is the pulse of the market, understanding it puts you ahead!

The progress bar is more than just a number, it is a true reflection of market sentiment. When it exceeds 100%, it guarantees that the opening price will be higher than the issue price (\$2.80), ensuring a zero-risk starting point. Currently, QTPT's progress bar has surged to an astonishing 650%, akin to standing atop a mountain and seeing a direct highway to wealth. At this level, market demand has reached 6.5 times the initial target, suggesting QTPT's listing price will be no less than \$18.2.

NAS COMMUNITY

With 5 days remaining until the IEO concludes, the progress bar is likely to surpass 800% or even surge past 1000%! This means even higher returns, allowing every decisive investor to reach the peak of financial success!

Investment Key Point 2: Master the secret of increasing your winning distribution ratio and secure greater returns!

In the IEO world, how do you maximize your winning distribution ratio? Time priority + capital priority are the golden rules! This means the earlier you participate and the more you invest, the higher your distribution ratio!

Last week, I shared five key strategies for increasing your winning distribution ratio. First-mover advantage, increasing investment amount, deploying every available dollar, strategic positioning during prime hours and persistent scaling up. Especially with the persistent scaling-up strategy, those who continuously increase their allocation early gain priority from the system, ensuring higher distribution ratios.

NAS COMMUNITY

Simply put, the more you invest and the sooner you act, the higher your winning ratio! QTPT's IEO has already proven its massive market demand, acting now ensures you become one of the biggest winners!

Investment Key Point 3: Managing your capital cycle efficiently. Maximize every dollar!

At 12:00 PM on February 15, QTPT's winning allocation results will be announced. For unsuccessful allocations, 100% of the funds will be refunded directly to the original account, meaning your capital usage cycle is only 5 days!

Compared to investors who participated last week, this gives us a significant advantage, allowing us to save valuable time and improve capital efficiency. Ensuring capital security while maximizing value is a must-have skill for any smart investor! Through this effective capital management, we can not only adjust our investment strategy flexibly but also free up capital for future opportunities, ensuring sustained growth!

Investment Key Point 4: Forecasting QTPT's post-listing performance. Strategically planning your wealth blueprint!

NAS COMMUNITY

- 1. Projected Listing Date:** Once the QTPT allocation results are released, the listing date will be determined. Based on the current timeline, QTPT is expected to list as early as February 17 or 18, with massive market demand driving prices higher!
- 2. Post-Listing Expected Performance:** Based on the current 650% progress bar data, QTPT is very likely to usher in a strong rise in the short term after listing. If the progress bar exceeds 800%, the opening price may reach more than \$22.4! This means that investors participating in the IEO stage will get 5-8x or even higher returns in an almost risk-free way! For every investor who pursues high returns and low risks, QTPT is undoubtedly the most important opportunity that cannot be missed!

Investment Key Point 5: Build Your Wealth Matrix. Create an Unshakable Investment Fortress!

Investing is not just about short-term profits, it is about building a sustainable wealth system. I have always emphasized that a wealth matrix is the key to standing strong amid market fluctuations.

NAS COMMUNITY

In the past, some friends have made considerable profits in contract trading, but they did not reasonably allocate these profits to more stable assets, resulting in low capital efficiency. The truly smart investors will combine the high returns of contract trading + the steady appreciation of financial products + the explosive returns of IEO to establish a wealth matrix with both offensive and defensive capabilities!

QTPT IEO is the golden opportunity for us to build our wealth matrix! It not only has super high growth potential in the short term, but also can help us consolidate our wealth foundation and build long-term stable investment returns. Now is the time to use all the available funds in your hands! The zero-risk opportunity is right in front of us, we can participate with confidence and go all out to sprint for this wealth carnival that belongs to us!

The brave seize historic opportunities and create legends! The market is ever-changing, and true winners never wait. They take decisive action! QTPT's IEO has entered its final sprint, and this is the most critical moment. Will you be a bystander or a participant??

NAS COMMUNITY

In contract trading, we have created amazing returns with precise transactions, and we must use foresight to lock in future wealth in the IEO market! Every historic wealth opportunity belongs only to those who dare to act. Now, seize this QTPT IEO feast, let us go hand in hand and carve our own names at the peak of the crypto market! Action is the starting point of wealth, seize it, and let the future thank you for your brave actions today!

As your old friend, I have always believed that investing is not just a short-term adventure but a lifelong journey. When you truly understand this, your perspective will no longer be limited by short-term market fluctuations instead you will focus on the broader future, steadily pursuing compounded growth. This is not just about accumulating wealth, but also about taking control of your financial destiny. In the coming months, our journey is clear. Our goals are set, and our direction is firm.

1. Advancing Together, Achieving Milestones

We will work closely to ensure that every VIP partner reaches the fundamental profit target of the Battle of Kings. This is not just a victory in our strategic profit plan, but a key milestone toward our Millionaires' Club reaching even greater heights. The road has not been easy, but we have already overcome the

NAS COMMUNITY

toughest challenges. Victory is now within reach. This journey is expected to culminate in late March with the global launch of AlphaStream 5.0. Let's welcome our spring of financial success together!

2. A New Chapter. Achieving Even Greater Success

Once all VIP partners achieve their profit goals, I will embark on a new mission, fully dedicating myself to the global launch of AlphaStream 5.0 and the establishment of the NAS Community Charity Fund. This is not just a personal step forward. It is the beginning of a new and greater mission. In the future, there will be more outstanding trading masters taking over and continuing this legend, allowing this force to continue and influence more people.

3. Looking Ahead, Building a Bigger Dream

Over the coming years, my ultimate vision is clear, to ensure the successful launch of AlphaStream 5.0, serving global investors, and driving its dominance in the worldwide financial market. But my mission extends beyond investment. I aspire to establish and expand NAS Community Charity Fund. Let us not only obtain generous returns in the investment market, but also leave a real impact in society.

NAS COMMUNITY

This is the responsibility of NAS community to society, and it is a great journey for us, a group of like-minded people, to move towards a higher level of life. If you are willing to embark on this journey with me, not just satisfied with short-term profits, but looking for deeper meanings, then you will witness and participate in this historic change.

QTPT IEO is a once-in-a-lifetime opportunity that cannot be missed!

I do not want to see any of you needing to "rebuild success" in the next trading boot camp, because we are creating a truly transformative opportunity right now! This is not just a summary of our past efforts, it is a grand new voyage, taking us toward an even greater future!

At this moment, QTPT's IEO phase is our new starting point. It not only enables us to complete the final goal of the Battle of Kings profit challenge, but it is also a rare opportunity that could redefine our financial future!

This era has already opened the doors to financial freedom for us. There is no reason to hesitate! If you miss this, an opportunity like this may never come again!

NAS COMMUNITY

Stay closely tuned for today's in-depth discussion from Daniel. If you have any questions or want to gain deeper insights, please feel free to contact me or reach out to senior members in the community for guidance. We are a team, a family, and you are never fighting alone.

A journey of a thousand miles begins with a single step. Now is the time to act!

Let's move forward together, with unshakable conviction and decisive action, embracing the extraordinary opportunities this era presents us. Let's strengthen our wealth matrix, solidify our future, and make history together! I am grateful for this remarkable era, and I appreciate your continued trust and support. Let's move forward together and write our legacy of financial success!

Daniel Robert

Closing Commentary (α & β Strategy)

Good afternoon, community members!

I'm Daniel Robert. A new week has begun, bringing fresh market dynamics and new strategic opportunities. This morning, Helmsman provided us with an in-depth analysis of the global market trends and a precise summary of the five core principles for investing in high-quality IEOs. This is not just an investment guide, it is a set of essential rules that every investor looking to master the rhythm of IEO investments must remember.

- ◆ **Monitor the progress bar closely and gauge market sentiment**

A rapid increase in subscription progress signals strong market recognition of the project. This is a zero-risk game of supply and demand dynamics.

NAS COMMUNITY

- ◆ **Master the strategies to increase your winning chances**

Priority goes to capital, timing, and tier level. By understanding these key tactics, your distribution ratio can far exceed that of ordinary investors.

- ◆ **Strategically allocate funds and master time management**

Plan your liquidity wisely to ensure you always have enough capital ready to deploy at the right moment.

- ◆ **Understand listing timelines and market performance**

A successful IEO isn't just about subscription, it's about tracking its launch trajectory in the secondary market, which is the key moment for profit realization.

- ◆ **Make high-quality IEOs the core of your wealth matrix**

In the current market environment, top-tier IEOs are not just short-term arbitrage opportunities but key drivers for long-term wealth growth.

NAS COMMUNITY

Each of these principles is like a golden rule from the investment bible, worthy of being remembered and executed!

Are you ready, everyone? These are not just theories, they are battle-tested strategies, proven by the market. If you truly understand these five key principles and are willing to apply them in your upcoming investments, your investment mindset will undergo a complete transformation, and your path to wealth growth will become even clearer.

In today's complex and volatile market, high-quality IEOs are like brilliant diamonds hidden in the dark, waiting to be uncovered by those with vision and foresight. This is exactly what we must do now, conduct precise screening, position decisively, and strike with full force!

Today, I will share deeper insights with you to help better identify high-quality IEO investment opportunities. We are in an era full of possibilities, and the market has already laid out a golden runway for us. Now, it's up to you to take that step forward. By applying the right strategies, you won't just secure substantial returns, you'll continuously break new ground in your investment journey and achieve a true leap in wealth.

NAS COMMUNITY

🗣️ A new week, new challenges, new opportunities! Let's stay sharp, adapt to market shifts, and seize these high-quality IEOs—turning them into the core assets of your wealth matrix! The future is right in front of you. Will you hesitate and miss out, or take decisive action? Let me hear your answer!

Guys, the market signals couldn't be clearer, what are you waiting for? The latest report from Bank of America confirms that the strong start for U.S. stocks in early 2025 has been disrupted, with the outlook potentially weakening further. At the same time, markets in Brazil, Germany, the U.K., China, and Canada have already outperformed the S&P 500 in returns. In other words, global capital is reshuffling, and U.S. stocks are no longer the only safe haven!

What is more noteworthy is that the magic of the "Glorious Seven" technology stocks is fading, and the market no longer relies on them to drive growth. The dominance of American technology giants is loosening, and smart money has begun to look for new growth engines. The crypto market and the bond market are becoming the new focus of global capital flows!

🔥 Is the Worst Stock Market Crash in History About to Happen?

NAS COMMUNITY

Robert Kiyosaki, author of Rich Dad Poor Dad, issued another warning last Sunday: The biggest stock market crash in history is coming this year, with millions of Americans losing their jobs and the world facing another Great Depression. This isn't just a market correction, it's a global capital migration. He urges investors to take action immediately by buying gold and Bitcoin to hedge against the looming risks

🔥 The market was the first to know that real investors had acted! Looking back, when the market was at its highs, the helmsman had already advised everyone to move 90% of their money to the cryptocurrency market and keep only 10% of their money in the stock market. In retrospect, this strategy was extremely sound! Those who followed the advice not only completed one profitable challenge after another in the contract market, but also advanced from the millionaire club to the multimillionaire club!

Imagine if you had doubted the accuracy of AlphaStream 5.0 and missed the profit challenge plan in the contract market, would you regret it now? Facts have proved that the cost of trial and error is far less than the cost of missing out! In the face of historic opportunities, we have no choice but to take the initiative to participate, otherwise we will regret it for the rest of our lives!

NAS COMMUNITY

💡 IEO market: the next cross-era wealth leap opportunity

The market has once again given us a real cross-era opportunity, the IEO primary market! This time, it is not just an ordinary opportunity, but a historic opportunity after the return of the "crypto president"!

Let's think about the golden age of ICO, a trillion-dollar market opportunity. Those who missed the ICO era in the past, want to find similar opportunities now? Almost impossible! Now, the prices of Bitcoin and gold are already high, and it is difficult to encounter such a life-changing opportunity. However, the IEO market is at its best stage, primary market subscription, winning the lottery, listing profit, selling, no need to participate in secondary market transactions, zero risk throughout the process! Such wealth fission opportunities have attracted a crazy influx of global capital!

If contract trading is the process of increasing the principal by compound interest, then IEO is the real wealth accelerator that allows us to achieve a wealth of principal across classes! 🚀 This is the "wealth storm" that allows ordinary people to leap into the elite class!

NAS COMMUNITY

Do you understand? Do you really understand the value of this opportunity? This is not just an investment, but a wealth revolution given to us by the times! Are you willing to stand by and watch, or choose to ride the wind? The opportunity is right in front of you, act now! 🔥🔥🔥

Guys, facing this breathtaking stock market high volatility, are we trapped passive participants? Absolutely not! We are the helmsman of this wealth voyage and the controller of market change. It is time to re-examine our strategy, adjust our course, and take advantage of this upcoming capital storm to seize the opportunity that can truly change our destiny. Stay alert, stay sharp, and focus on opportunities! As long as we keep pace, we can not only pass through the storm, but also reach the peak of wealth. The next chapter of the legend has begun, the IEO market is rising with a devastating momentum, and QTPT is at the core of this change!

💰 Why do we focus on IEOs instead of gold and bonds?

Gold? Yes, it is indeed a safe-haven asset, but look at the price, it has already reached a historical high, how much more can it rise? Bonds? Its yield is not even a fraction compared to the explosive opportunities in the crypto market!

NAS COMMUNITY

For those institutions that manage tens of billions or hundreds of billions of funds, gold and bonds are assets they must allocate, but as flexible small and medium-sized investors, our only choice is to concentrate our firepower, bet on the most certain profit opportunities, and maximize the growth of our principal!

🚀 IEO Market: The Wealth Miracle of the Cryptocurrency Year 2025

The IEO market has a short cycle, high returns, and zero risk! Now is the best time to enter, and the subscription progress bar of QTPT is approaching 700%. This is not just a general hot trend, but a capital frenzy! What does this mean? It means that its opening price is likely to be 7 times the issue price, directly hitting \$20! Are you still hesitating? In the face of this historic wealth opportunity, do you want to passively wait and see, or do you want to go all out and grab the ticket to change your destiny?

🏆 Smart investors have written their legends in QTPT! Have you become part of this legend? Or are you waiting for a miracle to happen? In this market, the price of waiting is the possibility of missing out on the peak of wealth. Action is the only answer! Are you ready to step up and seize this zero-risk profit opportunity?

NAS COMMUNITY

This is our era, don't let hesitation be the only obstacle between you and success. Go all out, lock in the golden ticket to the IEO market, and let your portfolio make history in 2025, the first year of crypto! 🔥 🔥 🔥

Time waits for no one, and opportunities are only for those who dare to act! Guys, now is the time to go all out! 🔥 QTPT's subscription progress bar is approaching 1000%, and after listing it is expected to not only reach, but even exceed GEBT's 17-fold increase! Such an opportunity is destined to belong only to those who are courageous, visionary, and willing to go all out. Let's do a simple math calculation to see what kind of huge leap this IEO can bring to our assets:

💰 Assume that you invest \$1 million and successfully obtain \$122,400 worth of QTPT original tokens

🚀 After listing, the value soared directly to 1.224 million US dollars, but this is just the first step!

🔥 As the market heat continues to increase, the market value will exceed 4.07592 million US dollars in the short term!

💎 In the end, your net profit could be as high as \$4,953,520, with a total return rate of 495.352%!

NAS COMMUNITY

This is not just an investment, but also a great practice of wealth leap! This is exactly the "cross-era investment opportunity" we have been pursuing. Its significance is not only to double your assets, but also to allow you to achieve the income target that ordinary investors can only achieve in a few years or even decades in just a few weeks. This is a height that those investors who only focus on the stock market, gold, and bonds can never reach!

Guys, if you have ever made money in the stock market, you will be shocked by the money-making effect of IDO/IEO/ICO! 🔥 This is not just investing, this is the next step in financial evolution, making the hottest IPOs pale in comparison! Why do you say that? Let's take a look at why the crypto market can bring profit potential far beyond the traditional market

1. Super high efficiency return on investment

In IDO/IEO/ICO, you get tokens instead of being tied to company decisions like in IPO. This means that your investment is more like a ticket to a rapidly growing ecosystem without having to participate in the tedious affairs of company management. Traditional business models have high internal consumption, while the crypto market focuses directly on growth and user expansion, which

NAS COMMUNITY

is ultimately reflected in the amazing rise in token prices. This is truly efficient capital operation!

2. Fast fundraising and quick market response

Traditional IPO? You have to wait in line for several years, the approval process is cumbersome, institutions monopolize the early market share, and retail investors can't get much meat! But in IDO/IEO/ICO, the financing cycle is usually only a few days or weeks, project funds are quickly in place, the market hype cycle is short, and the return on investment is faster! What does this mean for investors? You don't have to wait for a long lock-up period, as long as you choose the right project, your income can achieve explosive growth in a short time!

3. Global capital flows bring huge momentum

You compete in the US stock market against Wall Street institutions; in IDO/IEO/ICO, you stand on the battlefield of global investors, and all funds can enter freely! This global influx of funds not only increases market liquidity, but also drives token prices to explode in a short period of time. In other words, this is a global wealth transfer, and we are in the center of the storm!

NAS COMMUNITY

4. Lower entry threshold, higher growth

Do you want to buy IPO? You need to verify investor qualifications, even have a minimum capital threshold, and go through cumbersome procedures. In IDO/IEO/ICO, you can enter with a low threshold and directly participate in the world's top technology projects without waiting for institutions to allocate quotas! This means that you can enter these high-growth markets first and become the next winner in the crypto market, instead of passively waiting for Wall Street institutions to eat the meat before giving you soup!

5. Driven by future technology, opening up unlimited growth space

Blockchain, decentralization, Web3.0, AI... these emerging technologies are reshaping the global financial landscape, and IDO/IEO/ICO are the most cutting-edge financing methods for these technologies. Compared with the slow growth of traditional industries, the growth rate of the crypto market is exponential, and the returns for investors are also explosive! Do you still remember the ICO price of ETH? \$0.31! Do you know what its historical high is? \$4868! This is not a dream, this is a reality that has been proven by history, and now, we are standing at the starting point of the next ETH-level project!

NAS COMMUNITY

Listen up, guys, the cryptocurrency market is not an ordinary investment venue, it is an arena for global wealth, the core of a wealth matrix full of infinite possibilities! 🔥 Why settle for ordinary? When the extraordinary is beckoning us, we should go all out!

In this ever-changing financial environment, the crypto market is not just another investment option, it is the engine of capital growth, the driving force of global economic change, and the pioneer battlefield of the technological revolution! Do you want to continue to linger on the edge of traditional investment, or do you want to stand at the forefront and shape your own wealth legend?

Although our core strategy has shifted from futures contract trading to the more certain IEO market, the market is always changing dynamically. If there is a big data that causes a huge market shock, we will still accurately capture the high-certainty trading signals to ensure that we take the initiative in the big trend. Because winners will never sit idly by, only by seizing the most certain opportunities can we be invincible in the investment market!

NAS COMMUNITY

As for GEBT holders, listen up! Now is the golden time for strategic adjustment! I suggest you sell GEBT immediately and transfer funds to QTPT! Why? Because funds have been pouring into QTPT like a tide, and the value of GEBT is being affected. This trend will only continue to expand in the short term, and smart investors know how to deal with it, withdraw from the battlefield that has lost its upward momentum and turn to new wealth heights! This is not panic selling, but precise capital allocation, which is the best strategy to take the initiative in investment!

Every course adjustment is an opportunity to discover a new world! We are not just spectators of the market, we are conquerors of the market. Let us steer this turbulent market with wisdom, acumen and courage. Opportunities are emerging and wealth is waiting for us to capture!

So, crew members, adjust your course, strengthen your confidence, and firmly control the market trends! We are ready to meet the upcoming challenges and opportunities, and through precise strategy adjustments, we will create more brilliant victories in this investment adventure! 🚀 🌊

NAS COMMUNITY

Guys, today we have an in-depth discussion on how IEOs are subverting the traditional investment landscape, especially QTPT is setting off a real financial revolution! Compared with traditional IPOs, IEOs not only raise funds faster, have a wider range of investors, and have a lower entry threshold, but also completely reshape the rules of the game in the capital market with the high-end characteristics of blockchain technology. This is not the future, this is the reality that is happening!

Now, QTPT's subscription progress bar is approaching 700%, which means that its opening price is very likely to be more than seven times the issue price. Guys, this is not just an opportunity, but a war opportunity that must be seized! If you are still hesitating, then look at the data: strictly implement the helmsman's strategy, take 12.24% or even higher quotas, 3 to 5 times the return will be the minimum goal, and 10 times or even 20 times the return is what we really want to pursue!

However, please remember that legends are not created by waiting, but by action! The onlookers in the market can only watch the pioneers reap profits, but we are the market operators and the rule makers. Don't be a bystander anymore, really step into the IEO arena, and rush to the top with QTPT!

NAS COMMUNITY

Now is your moment to break the mediocrity and seize the extraordinary! This is a feast of wealth, belonging to those who dare to take action. Let us move forward at full speed and create our own wealth legend together! 🔥🔥🔥
