**Eastern Time, February 26, 2025**

**9:30 AM**

**Professor Montgomery Keane (Helmsman)**

**Morning Review**

**Good morning, team!**

**I am Montgomery Keane, your old friend. As an investor, have you ever wondered what the key to sustained success in the market really is? Every successful investor has their own philosophy, but what truly determines victory? Breaking free from habitual thinking, risk management, action-taking but above all, seizing historic opportunities granted by the times!**

**Think about legendary investors like Jesse Livermore. His classic book, Reminiscences of a Stock Operator, is considered the Bible of investing. Yet his life was a mixture of triumph and ruin. Ultimately, he lost to himself, to his ingrained patterns. If he had access to a quantitative system like AlphaStream 5.0 today, perhaps his fate would have been rewritten. Times have changed,**

**NAS COMMUNITY**

**tools have evolved, but the unchanging truth of the market remains: seize opportunities with certainty and go ALL IN!**

**At the beginning of 2024, the explosion of AI technology stocks and the technology craze led by NVIDIA enabled countless investors to achieve a leap in wealth. But as the stock market fluctuates at high levels, we swiftly adjusted strategies, shifting to the crypto market. AlphaStream 5.0's precision strategies have guided us through profitable cycles, consistently proving our foresight and decision-making ability from QTPT to GEPT!**

**But let me tell you a hard fact. Even these achievements are still within the secondary market, meaning they are subject to price fluctuations. Today, MDHT presents the most certain, zero-risk opportunity we have encountered!**

**📌 MDHT progress bar has surged past 4300%! This means an opening price of at least \$107!**

**📌 A zero-risk primary market subscription! No market fluctuations, no emotional volatility from secondary trading, this is the safest profit opportunity!**

**NAS COMMUNITY**

**📌 Less than 3 hours remaining before subscription ends! Your decision now will determine your financial future!**

**Is this your TRUMP coin moment? Of course not. The 450x gain in two days with TRUMP coin belonged to a presidential circle. MDHT belongs to anyone willing to act! But the key is you must see the opportunity and take part in it!**

**At this moment, GSC (Green Special Channel) allocation is almost sold out! Congratulations to those who decisively locked in 15%-45% quotas, your actions have proven your vision, and you are set to be the biggest winners of this IEO! In the future, when MDHT skyrockets post-listing, you'll thank yourself for being bold today, instead of regretting hesitation.**

**🚩 Final Reminder: This is not the time to observe, it's the time to act!**

**🚩 Ensure you don't miss the last GSC quota!**

**🚩 Less than 3 hours left before the subscription ends, time waits for no one!**

**NAS COMMUNITY**

**Opportunities belong only to those who dare to seize them. If you're ready, act now, don't let today become another missed chance! ALL IN on MDHT!**

**NAS COMMUNITY**

Friends, we are at a historical crossroads, where the divergence between the stock market and the crypto market is accelerating. Over the past few years, the “Magnificent Seven” dominated Wall Street, but now, these former market stars are fading. High valuations are unraveling, and capital is quietly retreating.

🚩 U.S. stocks are stuck in high-level consolidation, with weakening market confidence!

The S&P 500 has fallen for four consecutive sessions. American household confidence in the economy has plunged to new lows, and declining consumer sentiment is reflecting market instability. This trend reveals a harsh reality: the U.S. economy is entering an era of heightened uncertainty, and investors are seeking safe havens!

**NAS COMMUNITY**

🔍 **U.S. bond yields have significantly declined, capital is looking for a new growth driver!**

**As economic slowdown fears rise, funds flow into safer assets. The 10-year U.S. Treasury yield has dropped from 4.40% to 4.29%, far from January's 4.80% high. The logic behind this is simple, the market's confidence in future economic growth is declining and investors are beginning to worry about changes in the macro environment.**

💡 **But smart money never stands still, it simply shifts lanes. The next wealth windfall is already here!**

**Look at the crypto market! Look at MDHT IEO! Look at the explosive growth in the 2025 crypto bull run!**

💰 **Stock market uncertainty is rising, while crypto market certainty is strengthening!**

🚀 **Bitcoin surges past \$100,000, global capital is rushing in!**

🚀 **Trump pushes pro-crypto legislation. U.S. government is shifting to support crypto!**

**NAS COMMUNITY**

✦ The rise of DeFi, Web3.0, and the IEO market is ushering in a new era. ICO 2.0 is back!

✦ MDHT IEO progress bar has surpassed 4300%, expected listing price over \$100!

Looking back, whenever stocks stall, a new market emerges. AI stocks dominated before, now it's crypto's turn! Wall Street's past stars are dimming, while crypto's rising stars are ascending! Capital isn't vanishing, it's simply moving to new opportunities. And that opportunity is here—MDHT!

Don't wait until the whole world recognizes crypto's potential and regret not taking action earlier! Don't wait until MDHT skyrockets post-listing and lament not acting fast enough! Now is the moment to act! Stock market uncertainty is increasing, while MDHT presents a rare, high-certainty opportunity. Are you ready to exit traditional market stagnation and ALL IN on crypto market's wealth surge?

**NAS COMMUNITY**

**Time won't wait, and neither will opportunities. At this moment, GSC (Green Special Channel) spots are nearly gone. Those who secured GSC are set to be the biggest winners!**

**Don't be a bystander in the market, be helmsman who leads the trend! Take action now, lock in your MDHT allocation, and make crypto market your new wealth track! 🚀🔥**

**What are smart money doing? The answer is obvious! Friends, let's take a look at how the big institutions are planning for the future at this moment, and you will understand where you should put your money now!**

**📌 Berkshire Hathaway is stockpiling record-breaking cash, stock markets are losing their appeal!**

**Berkshire's latest Q4 report shows a staggering \$334 billion in cash reserves, the highest in history, making up 53% of its net assets! This marks the ninth consecutive quarter where Buffett's team has been a net seller of stocks. What does this tell us? They're sounding the alarm on market risks, and the appeal of traditional equities is fading fast. The management has been explicit, tariffs,**

**NAS COMMUNITY**

trade barriers, and other factors will have a negative impact on the market. Instead of increasing exposure to U.S. stocks, they'd rather sit on cash and wait.

✦ Bitcoin's shadow companies are making aggressive moves, securing future growth!

Meanwhile, Bitcoin's shadow company, Strategy is taking action! Between February 18 and February 23, they used funds raised from zero-interest convertible bonds to buy over 20,000 BTC at an average price of \$97,514 per coin! While Bitcoin's short-term technicals may appear weak, their 2025 price target remains unwavering, \$150,000!

💡 True smart money has already positioned itself in crypto market!

Back in early 2024, we started buying Bitcoin at \$60,000, set a target of \$100,000, and successfully hit it! Now, Bitcoin is approaching another mid-term buying opportunity, and thanks to our MDHT profits, we're perfectly positioned to capitalize on the next massive wealth-building opportunity!

**NAS COMMUNITY**

 **How to allocate funds after MDHT is listed? Two perfect options!**

 **Option 1: Invest in AlphaStream 5.0—AI-driven automated trading!**

**Let AI work for you! AlphaStream runs on both mobile and PC, executing 24/7 algorithmic trading to keep your capital working non-stop. The AI era is here, harness the power of technology to make investing easier and more efficient!**

 **Option 2: Go long on Bitcoin, targeting \$150,000!**

**With MDHT now listed, we'll be tracking market conditions closely, waiting for the perfect entry point to buy Bitcoin at a discount, with a \$150,000 price target. This isn't just an investment decision, it's a strategic move based on a deep understanding of market trends!**

 **The big question: Are you going to sit on the sidelines like Buffett or position yourself ahead of the curve like a true winner? Smart money always moves before the trend, not after it's confirmed. Still hesitant? Just look at what institutions are doing:**

 **Berkshire Hathaway is offloading U.S. stocks, waiting for a market correction!**

**NAS COMMUNITY**

✦ Strategy is buying Bitcoin aggressively, betting on a \$150,000 target!

✦ MDHT IEO progress bar has surged past 4,300%, with an expected opening price above \$107!

**When opportunity knocks, will you just watch or take action?**

**We nailed the Bitcoin trade in 2024! We won't miss MDHT and Bitcoin at \$150,000 in 2025!**

**MDHT IEO is in its final sprint! Time waits for no one. Act now, lock in your GSC allocation, and secure your financial future! 🚀🔥💰**

Dear Investors,

The MDHT Institutional Strategic Premium Allocation is now officially open! This round of allocation is designed exclusively for qualified institutional investors, offering a high allocation quota with 100% guaranteed allocation—no lottery required! Secure your premium token share directly, without being affected by the success rate of regular subscriptions. Limited spots available—first come, first served!

✦ Allocation Details

◆ Token Name: MDHT

◆ Allocation Period:

📍 Start Time: February 26, 2025, 12:10 PM (EST)

📍 End Time: February 27, 2025, 12:10 AM (EST)

◆ Total Allocation: 90,000,000 tokens (limited release)

◆ Subscription Price: 3.5 USDT per token

**NAS COMMUNITY**

**I know many of you have seen this announcement and are asking: Is MDHT an absolute game-changer?**

**MDHT subscription progress has surged past 4,300%, institutional premium allocation is now open! We are witnessing an unprecedented capital race! With MDHT's subscription progress exceeding 4,300%, this isn't just market hype, it's a testament to the confidence from both the MDHT team and the exchange. More importantly, MDHT has now introduced an institutional premium allocation, sending a clear signal to the market. They know the long-term value of MDHT and are willing to pay a higher price to accumulate more tokens!**

**🚀 Institutional allocation. The real capital battle happens!**

**Even during the regular subscription phase, institutional investors dominated. But as the progress bar blew past 4,300%, even these major players found it harder to secure allocations. In response, MDHT and the exchange swiftly launched an exclusive institutional premium allocation. Despite a 40% premium, the 90 million MDHT token allocation is expected to be snapped up in no time.**

**NAS COMMUNITY**

**More importantly, this guarantees a 100% allocation, far surpassing the 15%-45% allocation range we negotiated for the GSC community, completely eliminating the fierce competition of regular subscription phase. This will be one of the scarcest investment opportunities in the market, ensuring institutions dominate the MDHT ecosystem!**

**🚀 Why can't our community participate? This isn't a drawback, it's a signal!**

**Even though our NAS community holds institutional-level influence through pooled capital, this institutional allocation has a high entry threshold, restricted to accounts subscribing \$10 million+ per UID, which means that a single account must have huge capital strength. The funds of our community are jointly composed of many investors. Although the total amount is considerable, the average value of a single UID is still not enough to meet the institutional entry threshold. Therefore, we cannot directly participate in this institutional allocation.**

**But this isn't bad news, it further validates MDHT's long-term potential! Think about it. MDHT is offering a 40% premium institutional allocation with zero risk. This means they're incredibly confident in MDHT's post-listing value, and**

**NAS COMMUNITY**

**institutions are so bullish that they're willing to pay a premium just to get in. This tells us that MDHT's future is far more promising than we expected!**

**🔥 What should we focus on next?**

**1. Will institutional allocations sell out 100% within the timeframe?**

- **If yes, this will be the strongest market endorsement for MDHT!**
- **If not, the exchange and project team will reclaim the remaining tokens to complete the allocation process.**

**2. After MDHT is listed, the actual entry strength of institutional funds!**

- **The level of institutional participation will directly impact MDHT's liquidity and market performance, so we must track it closely!**

**3. How can we maximize the value of our existing MDHT holdings?**

- **All GSC subscribers now have already secured the rarest allocations, we've won the game before it even started!**
- **GSC allocation is running low. If you haven't locked in your share yet, this is your last chance!**

**NAS COMMUNITY**

🎯 **Summary: This is the strongest buy signal for MDHT yet!**

The institutional premium allocation doesn't put us at a disadvantage, it actually confirms MDHT's explosive future! Institutions are paying a 40% premium without hesitation. They're putting real money on the line, showing us that MDHT's market valuation is still massively undervalued!

As members of NAS community, we've secured the most valuable allocations through GSC. Now, all we have to do is wait for the market to reward us! 🚀🚀

**Action always beats hesitation!**

GSC allocation is almost gone. If you haven't locked in your MDHT tokens yet, this is your **FINAL** chance! Act now and secure your place on the winning side! 💰🔥

**NAS COMMUNITY**

**3:30 PM**

**Daniel Robert**

**Closing Commentary ( $\alpha$  &  $\beta$  Strategy)**

**Good afternoon, community members!**

**I am Daniel Robert. This morning, helmsman has pointed out the core profit logic, when a certain opportunity appears, you must ALL IN! Think back on your investment journey, how many times have you encountered opportunities that are almost "sure to make money", but hesitated because of fear of risks? What was the result? The opportunity slipped away, the market soared, and you could only sigh in regret.**

**Many people always say: "Risk first." Of course, being cautious is a good thing, but if you blindly pursue safety, the ship will always stay in the port and will not sail to the other side of wealth! The market is risky, and 100% guaranteed profit**

**NAS COMMUNITY**

**opportunities will not appear in the secondary market. Only the primary market can provide real ultra-high certainty!**

**As helmsman said, investing requires courage, especially in the face of clear opportunities! Remember January 2024? Technology giants such as Nvidia and SMCi were soaring all the way, and the elites of the community heavily invested and even leveraged to enter the battlefield! Risks? Of course there are! But the final victory belongs to those who dare to ALL IN! We not only won, but also won beautifully!**

**Now, MDHT IEO has given the same signal!**

**✓ When the progress bar breaks through 100%, the zero-risk profit has been locked!**

**✓ The GSC mechanism is online to ensure that we can grab the maximum amount!**

**✓ All participants have locked 15-45% of the chips in advance!**

**This is the best proof of rejecting inertial thinking and bravely seizing certain opportunities! The question now is, do you want to continue to hesitate and wait**

**NAS COMMUNITY**

for regrets after the market takes off, or go ALL IN and control your own wealth future?

🔥 Guys, the bell of victory has rung! With the official end of the ordinary online subscription, the progress bar finally stopped at 4500%, at this moment, the market has given a clear answer! What does this mean? MDHT opened firmly at \$112, without any suspense! The 4503% progress bar also announced a fact, the winning rate of ordinary subscription has dropped significantly, less than 2.5% or even lower, and this is why the value of GSC privileges is irreplaceable!

💡 Today, we want to pay tribute to all the friends who took decisive action in this MDHT subscription! Your courage, your determination, and your execution determine where you stand today! In front of the market, hesitation will only make you miss opportunities, and action is the only way to wealth.

You chose ALL IN, and the market will respond to your decision with the most generous returns! GSC - the privilege of the winner! Let us make it clear: GSC is not charity, nor is it luck, it is something we actively strive for!

- It is your grasp of opportunities!

**NAS COMMUNITY**

- It is the reward for your brave decision!
- It is your winner's pass in this subscription battle!

The value of GSC can only be enjoyed by those who really dare to go all in! We not only grabbed the top quota, but also seized the most certain profit opportunity in the primary market! So, now the question is, do you really respect the GSC in your hands?

👉 ALL IN is the greatest respect for GSC!

👉 ALL IN can maximize your profits!

👉 ALL IN can ensure that you become the controller of the market, rather than a bystander who misses the opportunity!

📣 Guys, the market has given the answer, and what remains is our action! This is not just an IEO subscription, it is a celebration for the winners! GSC in your hands is the opportunity given to you by fate, now, it's time to prove with action that you deserve it! 🚀 🔥

NAS COMMUNITY

Dear Investors,

The MDHT Institutional Strategic Premium Allocation is now officially open! This round of allocation is designed exclusively for qualified institutional investors, offering a high allocation quota with 100% guaranteed allocation—no lottery required! Secure your premium token share directly, without being affected by the success rate of regular subscriptions. Limited spots available—first come, first served!

📌 Allocation Details

◆ Token Name: MDHT

◆ Allocation Period:

📍 Start Time: February 26, 2025, 12:10 PM (EST)

📍 End Time: February 27, 2025, 12:10 AM (EST)

◆ Total Allocation: 90,000,000 tokens (limited release)

◆ Subscription Price: 3.5 USDT per token

🔥 Guys, today's announcement is very informative, and the helmsman has already done a detailed interpretation. But I want to emphasize one key point again, the launch of institutional placements is not only in line with market expectations, but also a strong signal!

Why? Because institutional funds are always the vane of the market! Whether it is the stock market or the crypto market, institutional funds are always the drivers of trends! There is no doubt about this. And in the subscription process of MDHT, the driving role of institutional funds has long been obvious. The progress bar finally stopped at 4503%, which means that the subscription

**NAS COMMUNITY**

**winning rate of institutions has dropped significantly, leaving only 2.2% or even lower! What is the result? In less than 4 hours, 90 million MDHTs were swept away! What does this mean? Institutions are so optimistic about MDHT that they are buying it frantically regardless of cost!**

**GSC, the privilege we fought for! In this subscription storm, our community negotiated with the fund pool and won 30 million GSC quota. Although our allocation ratio is only 15-45%, which is far lower than the 100% subscription winning rate of institutions, it is enough for us to stand at the commanding heights of the market!**

**So, don't complain about the quota! If you dare to go all in, the market will give you the most generous rewards! My personal subscription funds have exceeded 10 million US dollars, but because it is not an institutional account, I cannot participate in institutional placements. But do you know? I filled the GSC quota without hesitation, without reservation! This is not only a recognition of myself, but also the best reward for my hard work during this period!**

**NAS COMMUNITY**

**Institutional placement is not bad news, but a strong market signal! Think about it, since MDHT dares to conduct institutional placement at a premium of 40% under the premise of "zero risk", what does this mean?**

- ✓ They are confident in the value after listing!**
- ✓ They know that the market will definitely pursue it!**
- ✓ Institutional funds have already told you with real money, the future value of MDHT is far more amazing than you can imagine!**

**So, now the question is, do you really respect your GSC? GSC is not for nothing, but we win it back with our keen market judgment and courageous action! If you miss it, then ask yourself, what are you waiting for? ! Institutions are rushing to ALL IN, and you are still hesitating?**

**Guys, the MDHT subscription war has come to a perfect end. The next step is to welcome the ultimate return from the market! Be brave and the market will never let you down!**

**NAS COMMUNITY**

**Why are institutional funds so optimistic about MDHT? The latest research report released by Deutsche Bank reveals to us this trillion-dollar blue ocean market that is about to explode!**

**Guys, have you ever imagined a future where humanoid robots will enter every household, appear in every factory, hotel, logistics center, and even hospital? Now, this future has quietly arrived. Just like the technological revolution led by the Internet, smartphones, and artificial intelligence (AI), humanoid robots are turning from science fiction into reality!**

MindHub provides a broader platform for cultural dissemination and exchange. Through the MindHub platform, people can more easily access information and content from different regions and cultures, promoting cultural diversity and exchanges. This also provides new opportunities and space for the cultural and creative industries, promoting cultural prosperity and innovation.

**NAS COMMUNITY**

**Deutsche Bank's latest research report just released reveals a trillion-dollar market that is about to explode! The humanoid robot industry is accelerating into the mainstream, and the next decade will be the craziest wealth window in this field!**

 **Market expectations: Humanoid robots will become the next technological leader!**

 **2035 - the market size is expected to reach 75 billion US dollars!**

 **2050 - the market size will exceed 1 trillion US dollars, and global sales may exceed 70 million units!**

**This is not just a technological breakthrough, but also a major reshuffle that completely subverts the global industrial landscape! This means that in this investment frenzy, the real winners will be those who take the lead and dare to go all in!**

**NAS COMMUNITY**

 **MDHT: Control the peak of future technology investment!**

**In 2025, AI ushered in an unprecedented breakthrough, and MDHT is standing at the center of the "AI + humanoid robot" era! Remember who the winners were in the past 10 years?**

- **Bitcoin was less than \$10 in 2011, and now it has exceeded \$100,000!**
- **Tesla's IPO stock price in 2010 was less than \$20, and now it has become a technology giant with a market value of more than one trillion US dollars!**

**Now, the humanoid robot market is reproducing this scene, and MDHT is your ticket! Why is MDHT a must in this technological revolution?**

- ✓ **"AI+humanoid robot" golden track, global capital is competing for layout!**
- ✓ **MDHT stands at the core of the industrial chain and cooperates deeply with top technology companies!**
- ✓ **MDHT is not just a crypto asset, it is the perfect combination of "technology + finance"!**
- ✓ **GSC quota ensures that we stand at the commanding heights of the primary market and lock in certain profits one step ahead of others!**

**NAS COMMUNITY**

**Just imagine, the MDHT team dared to conduct institutional placement at a 40% premium under the premise of "zero risk". What does this mean? They are confident in the value after listing! Institutional funds have voted with real money, and the market will usher in even crazier growth!**

**In 2024-2025, the investment window for humanoid robots has opened! Every time a technological revolution occurs, there will be a group of pioneers who decisively enter the market and eventually achieve exponential returns. If you missed Bitcoin and Tesla, do you want to miss MDHT?!**

**● This is not a "possible" opportunity, but a future that has been verified by institutions and the market!**

**🚩 With GSC in hand, we have already grasped the absolute first-mover advantage!**

**🚀 ALL IN MDHT, let yourself become the master of the new world, not a bystander!**

**Wealth will not wait for you, the market does not believe in hesitation! Act now, seize the advanced layout of MDHT, and let us welcome the craze of this humanoid robot revolution together!**

**NAS COMMUNITY**

tonight will be a critical moment! The helmsman was invited to participate in the core video conference organized by COINFEEAI Trading center and the MDHT project. This is not just an ordinary meeting, but a strategic dialogue that may bring major breakthrough benefits!

- 💡 What explosive news will be revealed soon?
- ✅ Will MDHT's market layout usher in a new round of upgrades?
- ✅ Will institutional funds have greater actions?
- ✅ Will GSC holders usher in more advantageous policies?

All of this will be revealed after the meeting tonight! And tomorrow morning, the helmsman will bring first-hand in-depth analysis to the community, so that we can grasp the most critical information first!

🔴 The market is changing rapidly, and the winners are always those who have the fastest information and the fastest actions!
